

From Medical Mall to a “Place to Care for Yourself”

7 Shops to Open, Including OBGYN Clinic and Femtech Specialty Store
Medical Wellness Mall Welpa to Open
Friday November 19
on 10th Floor of Shinsaibashi PARCO

PARCO Co., Ltd. (“PARCO”) hereby announces its new concept medical mall Welpa, which seamlessly provides medical care, products and services, will open on Friday November 19, 2021 on the 10th floor of Shinsaibashi PARCO, which is celebrating its first anniversary.

■Introducing Welpa

Medical wellness mall Welpa is a new concept medical mall, designed to be a place to visit not only if you require medical care, but also a “place to care for yourself,” making daily life a little more enjoyable. Welpa offers a wide range of products and services useful for daily self-care, from medical care to food products.

Women in their 20s to 40s, who are PARCO’s core customer group, face many health challenges and have a higher risk of contracting cancer than men of the same age, while the percentage of these women who have not undergone a medical checkup or physical examination is higher than men of all ages. This can be attributed to being busy with both work and family, causing women to deprioritize taking care of themselves, and the fact that necessary information for checkups and healthcare is not always widely available. Welpa provides an easily accessible environment for busy women in their 20s to 40s, empowering them to make a habit of enjoyable self-care.
